

FABRIC DYEING WORKSHOP

COLOR BY DESIGN

CHOICE OF TWO DATES:
Thursday, June 12 or Friday, June 13
9:30am - 3:30pm

Join Sharon Wasteney, educator, author, quilter and creative thinker in this hands-on workshop at her home. Learn to use fiber reactive dyes on cotton fabric using three different methods with separate results. Use “recipes” as well as your own color choices to dye 2 yards of prepared for dyeing cotton fabric (provided). Colorfast and wash fast finished fabric is uniquely yours ready to be used in your next quilting project.

Participants will bring the following:

- **Mask** (for use when using powdered dyes)
- **Protective gloves** (to avoid dyed cuticles!)
- **3 shoe box size plastic containers with lids** (approx 6" x 12" x 4") for dyeing and taking home your projects
- **1 yard of “ugly” fabric or equivalent of vintage linens** to creatively reinforce the techniques learned.
FABRIC MUST BE PREWASHED 100% NATURAL FIBER like cotton, silk, linen, bamboo or rayon but not wool. (If you bring a blended fabric like a poly/cotton blend the polyester will not take the dye but the cotton will.)
- **Sack lunch**

Participants will go home with:

- 2 total yards of cotton fabric
- 1 yard equivalent of participant fabric
- A written outline of the processes and resources necessary for personal use
- A happy smile!

Workshop location: 9701 County Road 410, Hannibal, MO | Cost: \$75
Six student maximum each day

WORKSHOP SCHEDULE

Processes of dyeing natural fabrics

Low water immersion dyeing (three variations)

A bit of history and more about dyeing variety of fabrics

- - LUNCH BREAK - -

Ice dyeing

Self-directed dyeing

Clean-up

Reveal low water immersion (partial rinse)
